PROVINCE OF KWAZULU-NATAL

KZNDARD RABIES VACCINATION CAMPAIGN IN NORTHDALÉ, PIETERMARITZBURG

The MEC for Agriculture and Rural Development in KwaZulu-Natal, Mr Themba Mthembu, hosted a vaccination drive in the area of Northdale, Pietermaritzburg on 10 May 2018. This vaccination drive was held mainly due to a detection of possible rabid dogs in the area about two weeks ago. As the Department is currently on a massive campaign to create awareness on the possible spread of this scourge to both animal and humans, this was one of the many vaccination drives being rolled out to mitigate the spread of this disease in the Province.
