

PROBLEM ANALYSIS

CHALLENGE	ROOT CAUSE	EFFECT	INTERVENTION
No mechanisation plan e.g poor management of mechanisation fleet i.e. site storage of tractors, service agents for maintenance and repairs, diesel management.	Lack of policy direction	Inconsistent, poor and delayed mechanisation support	Approved Mechanisation policy/ framework
			Re-engineered Standard operating procedures
Untimely/Delayed/Poor pre-planning to facilitate production inputs.	Lack of fixed service provider for contracts.	Delays in procurement	Establish contracts for the supply of Fertiliser, Seed, agro-chemicals
			Approved project approval process (SOPS) Policy/Frameworks to guide implementation of departmental strategy
			Allocation of budgets by February of each financial year
Untimely/Delayed/Poor pre-planning to facilitate infrastructure support e.g. fencing, irrigation, dams, boreholes.	Lack of fixed service provider for contracts.	Delays in procurement	Develop existing contracts: Fencing, irrigation, boreholes
			Approved project approval process (SOPS) Policy/Frameworks to guide implementation of departmental strategy
			Allocation of budgets by February of each financial year
